# COTTON SEED

## NELSON'S CERTIFIED ACALA, COLLEGE STRAIN

### In the Lint—

Blue Tag .....\$4.00 per 100 lbs.

Red Tag ..... 3.50 per 100 lbs.

### In the Lint, Graded—

Blue Tag .....\$4.50 per 100 lbs.

Red Tag ..... 3.75 per 100 lbs.

### Delinted—

Blue Tag .....\$7.50 per 100 lbs.

Red Tag ..... 6.75 per 100 lbs.

This cotton seed was grown by Fred Nelson of the East Grand Plains District. It is state certified by the State Crop Improvement Association. The graded seed is run through a grading machine which removes all the dirt, trash and small immature seed, but does not remove the lint. The other seed in the lint, is just as it came from the gin. The seed loses about 10% in the grading operation.

The delinted cotton seed is the same seed with the lint removed by an acid process. This process removes all trash, dirt and immature seed to the extent of about 30%. The acid kills disease germs which are transmitted from one crop to another in the seed to the extent of about 85%. This as shown by test.

If you have not received our 1936 Seed Catalog your name on a postal card will bring it.
